

## Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact [support@jstor.org](mailto:support@jstor.org).

## COMMUNICATIONS FORWARDED.

Acknowledging gifts to the Library, . . . . .	1,022
Acknowledging gifts to the Museum, . . . . .	77
Acknowledging photographs and biographies, . . . . .	7
Requesting the supply of deficiencies in journals, . . . . .	85
Correspondents' diplomas and notices of election, . . . . .	2
Letters of sympathy or congratulation and addresses, . . . . .	9
Miscellaneous letters, . . . . .	136
Copies of annual reports sent to correspondents, . . . . .	213
Circular letters, . . . . .	95

---

Total forwarded, . . . . . 1,646

Respectfully submitted,

J. PERCY MOORE,  
*Corresponding Secretary.*

Medicine.....	23	Unclassified.....	25
Anthropology.....	21		

Two thousand and twenty volumes have been bound during the year, making a notable improvement, especially in the department of journals and periodicals. The shelf list in this department has been completed and will be of use, not only in taking stock, but in any rearrangement of the volumes which may be hereafter necessary. The general card catalogue has of course been kept up to date. In connection with the preparation of work for the binders constant effort is made to secure supplies of deficiencies, in many cases with gratifying success.

The necessity for more room becomes every day more urgent. The growth of certain departments has heretofore been provided for by encroachment on the study rooms. This has been so manifestly to the inconvenience of those occupying the rooms that some of these books have been removed to shelving placed above the cases. These shelves have to be reached by ladders, and the arrangement is only tolerable as a temporary relief from crowding. It is believed that ample provision for at least storing accessions will be provided in the proposed new building, a large part of which will be designed for the erection of tiers of stacks.

The proofs of the Union List of periodicals in the libraries of Philadelphia have been read, and the work will be issued early in March under the auspices of the Free Library. It will be of the first importance in coöperative work.

It is gratifying to know that the present arrangement of the Library was warmly commended by the members of the International Congress of Zoologists, who were entertained here last September.

The Librarian read a paper on the use of books on Natural History at the Conference of the American Library Association, held at Asheville in May. The paper has been published in the first volume of the *Bulletin* of the Association.

Acknowledgment is again gladly made of indebtedness to the Assistant Librarian, William J. Fox, for efficient service both in the Library and the Publication Office.

EDWARD J. NOLAN,  
*Librarian.*
